***Re: Aeronet Global Communications Inc., Notice of Ex Parte Communication,
Use of Spectrum Bands Above 24 GHz for Mobile Radio Services, GN Docket
No. 14-177; IB Docket No. 15-256; RM-11664; WT Docket No. 10-112; IB
Docket NO. 97-95; WT Docket No. 10-153***

Dear Ms. Dortch:

On November 6, 2017, Brian Russell and Ivor Fitzpatrick of Aeronet Global Communications Inc. and Roger Sherman of Waneta Strategies, LLC spoke by telephone with Rachael Bender, Legal Advisor to Chairman Pai regarding the above-referenced proceeding.

During the discussion, Aeronet described how its innovative technology to provide high speed broadband service in commercial aircraft and on ships would help the United States assert global leadership in the growing market for in-flight and on-ship connectivity. Aeronet expressed appreciation for recognition of its proposed use in the 70 GHz and 80 GHz bands (“E-band”) in the draft item, and reiterated the Company’s view that its technology will not negatively impact other users in the band. Aeronet noted that allowing it to operate as an enhanced fixed service using Scheduled Dynamic Datalinks would generate significant public interest benefits by providing “at-home” and “at-work” style connectivity in the aviation and maritime markets.

Aeronet also noted that because it is at a critical stage of customer testing and development, the sooner the Commission establishes the “rules of the road” for the E-band, the sooner the Company can bring its innovative product to market. Accordingly, Aeronet urged that the Commission clarify its intent to act expeditiously and by a date certain to consider proposals for future uses in the E-band. Since the draft item would move consideration of such E-band proposals to the Wireless Backhaul Proceeding (WT Docket No. 10-153), Aeronet urged additional clarity regarding the process and timing for consideration of those issues.
